About the Role

Imagine shaping the future of retail at Sam's Club, where rapid growth and innovation are at the forefront of our mission.

At Sam's Club, we are people-led and tech-powered. Our data and insights shape how we serve our members.

This is more than just a role; it's an opportunity to make a step change in the business, where your contribution will be valued.

Key Responsibilities

Business Context Understanding and Tech Problem Formulation: Requires a deep understanding of analytical business context and the ability to translate business objectives into technical requirements.

Guide teams in analytical modeling, including feature relevance and selection, exploratory data analysis, and model development.

Oversee model assessment and validation, ensuring robust testing and tuning of models to achieve accurate results.

Data Strategy: Requires knowledge of understanding of business value and relevance of data and data engineering.

Provides overall direction by analyzing business objectives and customer needs; developing, communicating, and implementing data strategies.

Collaborate with executives and cross-functional teams to integrate analytics and AI solutions, delivering actionable insights.

Develops and implements strategies to attract and maintain a highly skilled and engaged workforce by diagnosing talent needs.

Cultivates an environment where associates respect and adhere to company standards of integrity and ethical behavior.

Develops and leverages internal and external partnerships and networks to maximize the achievement of business goals.
