

Position Summary...

What you'll do...

We are seeking a Data Strategy Manager to support the development and execution of data-driven initiatives.

This role is an exciting opportunity for a data-driven professional looking to advance their career in data strategy.

About Walmart+

Walmart+ is a membership program that brings together valuable in-store and digital benefits like no other.

Key Responsibilities:

- Assist in designing and executing multi-phased data strategy roadmaps.

- Support the development and implementation of data enrichment strategies and data foundations for Walmart+.

- Partner with key business stakeholders to understand data needs and provide strategic recommendations.

- Manage and maintain data governance practices, ensuring compliance with enterprise standards.

- Collaborate with data scientists, engineers, and analysts to enhance data accessibility and usability.

- Contribute to the development of analytics frameworks to drive insights and improve decision-making.

- Identify opportunities to optimize data utilization across revenue-generating functions.

- Ensure Walmart+ data practices align with enterprise data management principles.

- Support business units in making data-driven decisions.

- Stay informed on emerging trends in data analytics, governance, and emerging technologies.

- Assist in fostering a culture of data literacy through training and knowledge-sharing initiatives.

Day-to-Day Expectations:

- Act as the primary point of contact for cross-functional teams on data strategy initiatives.

- Oversee project timelines, milestones, and deliverables to ensure alignment with strategic objectives.

- Coordinate and facilitate meetings with stakeholders to gather requirements and update on progress.

- Develop detailed project plans and track execution to ensure successful delivery.

- Provide hands-on support in data analysis, governance policy implementation, and business process optimization.

- Work closely with data stewardship and data engineering teams to address data quality needs.

- Build communications to leadership on progress, challenges, and recommendations in relevant teams.

- Identify risks and develop mitigation strategies for data-related projects.

- Ensure documentation of processes, best practices, and lessons learned for continuous improvement.

Qualifications:

- 3+ years of experience in data strategy, data management, or analytics.

- Bachelor's degree in Data Management, MIS, Analytics, Computer Science, Business, or a related field.

- Strong understanding of data structures, governance, and analytics methodologies.

- Experience with business intelligence tools, SQL, BigQuery, and enterprise platforms such as GCP, Azure, or AWS.

- Ability to translate business requirements into data-driven solutions.

- Excellent communication skills to interact with both technical and non-technical stakeholders.

- Strong problem-solving abilities with a proactive and analytical mindset.

- Familiarity with membership programs is a plus.

Benefits & Perks:

Beyond our great compensation package, you can receive incentive awards for your performance. Other great benefits include:

Equal Opportunity Employer:

Walmart, Inc. is an Equal Opportunity Employer – By Choice. We believe we are best equipped to help our associates succeed when we embrace diversity and inclusion in our workforce.

At Walmart, we offer competitive pay as well as performance-based bonus awards and other great benefits for all associates.

You will also receive PTO and/or PPTO that can be used for vacation, sick leave, holidays, or other purposes.

For information about PTO, see <https://one.walmart.com/notices>.

Live Better U is a Walmart-paid education benefit program for full-time and part-time associates in Walmart U stores.

Eligibility requirements apply to some benefits and may depend on your job classification and length of employment.

For information about benefits and eligibility, see One.Walmart.
