

Position Summary...

What you'll do...

Job Description:

As a Data Scientist III on the Data & Customer Analytics team, you will be responsible for developing, deploying, and maintaining machine learning models.

This is an individual contributor position reporting to the Director of Data Science, and it requires working closely with cross-functional teams.

You'll sweep us off our feet if...

You relish working with large volumes of data, enjoy the challenge of highly complex technical contexts, and are a self-starter.

You are an expert in data modeling, ETL design, and business intelligence tools, identifying strategic opportunities for data-driven insights.

You excel at architecting scalable and resilient data solutions for real-time and batch processing.

You are familiar with Generative AI and the use and deployment of LLMs.

What you'll bring...

Experience in building highly scalable Big Data solutions and ETL ecosystems.

Proficiency with Hadoop, Spark, Cloud, Python/PySpark, Java, Streaming, Kafka, and backend technologies.

Experience utilizing public cloud platforms (Azure, AWS, Google Cloud) to deploy scalable ML solutions effectively.

Proficiency in programming languages (Python, Java, Scala) and ML frameworks (TensorFlow, PyTorch, Scikit-Learn).

Key Responsibilities:

Develop predictive models and machine learning algorithms to enhance customer experience.

Analyze large datasets to identify trends and insights.

Collaborate with business stakeholders to define data requirements and objectives.

Present findings and recommendations to both technical and non-technical audiences.

Stay current with industry trends and best practices in data science.

Qualifications:

Bachelor's degree in data science, Statistics, Computer Science, or a related field (Master's preferred).

4+ years of experience in data science or a similar role.

Proficiency in programming languages such as Python, R, or SQL.

Experience with machine learning frameworks and data visualization tools.

Strong analytical and problem-solving skills.

Why Join Us?

Opportunity to work in a fast-paced environment with cutting-edge technology.

Collaborate with a diverse team dedicated to driving customer insights and analytics.

At Walmart, we offer competitive pay as well as performance-based bonus awards and other great benefits for all associates.

You will also receive PTO and/or PPTO that can be used for vacation, sick leave, holidays, or other purposes.

For information about PTO, see <https://one.walmart.com/notices>.

Live Better U is a Walmart-paid education benefit program for full-time and part-time associates in Walmart U stores.

Eligibility requirements apply to some benefits and may depend on your job classification and length of employment.

For information about benefits and eligibility, see One.Walmart.

The annual salary range for this position is \$90,000.00-\$180,000.00.

Additional compensation includes annual or quarterly performance bonuses.

Additional compensation for certain positions may also include:

- Stock

Minimum Qualifications...

Outlined below are the required minimum qualifications for this position. If none are listed, there are no minimum qualifications.

Option 1: Bachelors degree in Statistics, Economics, Analytics, Mathematics, Computer Science, Information Systems, or related field.

Preferred Qualifications...

Outlined below are the optional preferred qualifications for this position. If none are listed, there are no preferred qualifications.

Data science, machine learning, optimization models, Master's degree in Machine Learning, Computer Science, or related field.

Primary Location...

702 Sw 8Th St, Bentonville, AR 72716, United States of America
